Notes:

- Select all parts in accordance to works order card and table above.
- Strip and solder cable to connectors as per relevant circuit diagram, remember to thread clear heat shrink (Item 7) and sleeves (Items 2 & 4) onto cable before you start soldering. Cover all solder joints with small heat shrink. Fan out braid from cable ends and clamp under lemo collet.
- Once assembled test cable for correct wiring and check for any unwonted shorting.
- Clip ferrite in position as shown.
- Stick label in position and secure in place with clear heat shrink.
